

# FUND UPDATE

FOR THE QUARTER ENDED 30 SEPTEMBER 2022

MACQUARIE

## Macquarie Investment Funds

### Macquarie Real Return Opportunities Fund<sup>1</sup>

This fund update was first made publicly available on: 31 October 2022

#### What is the purpose of this update?

This document tells you how the Macquarie Real Return Opportunities Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Macquarie Asset Management Public Investments (NZ) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The fund is a diversified fund that aims to generate a positive return above inflation. Assets are actively managed, with the flexibility to actively respond to changing market conditions with a flexible approach to investing.

Assets are managed using an approach with multiple managers. The underlying funds provide diversity across asset classes, sectors, geographies and investment managers, and have the ability to change the investment allocations in order to actively respond to changing market conditions. Risk mitigation strategies within the underlying funds are designed to lower expected volatility and reduce the impact of market related events. The underlying funds do not have a target asset allocation, rather, the funds operate within broad ranges.

Active currency hedging back to Australian dollars is undertaken within underlying funds. The Australian dollar exposure of the fund is hedged back to New Zealand dollars.

The performance objective of the fund is to provide a Real Return (see note 2 below) of greater than 4% per annum over a rolling five year period.

<b>Total value of the fund</b>	NZ\$36,919,166
<b>The date the fund started</b>	11 December 2013

#### What are the risks of investing?

Risk indicator for the Macquarie Real Return Opportunities Fund (see note 3 below):

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

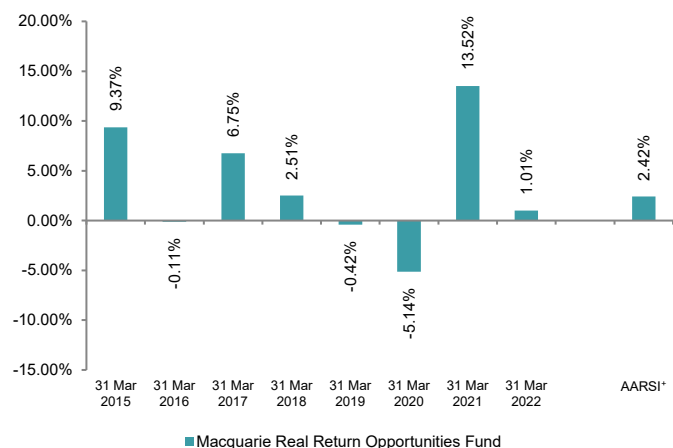

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period to 30 September 2022. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

#### How has the fund performed?<sup>4</sup>

	Average over past 5 years	Past year
<b>Annual return<sup>5</sup> (after deductions for charges and tax)</b>	0.94%	-5.38%
<b>Annual return<sup>5</sup> (after deductions for charges but before tax)</b>	1.75%	-6.39%

## Annual Return Graph<sup>6</sup>

\* Average Annual Return Since Inception to 30 September 2022

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2022.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Macquarie Real Return Opportunities Fund are charged fund charges. In the year to 31 March 2022 these were:

	% of net asset value
<b>Total fund charges</b>	1.42%
Which are made up of:	
<b>Total management and administration charges</b>	1.42%
Including:	
Manager's basic fee (excluding GST)	1.15%
Other management and administration charges (including GST)	0.27%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the Macquarie Investment Funds Goals Based Funds on the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose) for more information about those fees.

## Example of how this applies to an investor<sup>7</sup>

Small differences in fees and charges can have a big impact on your investment over the long term.

Jeff had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jeff received a return after fund charges were deducted of \$234 (that is 2.34% of his initial \$10,000). This gives Jeff a total return after tax of \$101 for the year.

## What does the fund invest in?

This shows the types of assets that the fund invests in.

### Actual investment mix\*

\*The investments categorised as "other" are investments in alternative asset strategies.

### Target investment mix\*\*

\*\*The investments categorised as "other" are investments in underlying multi-assets funds, as described in more detail in the Statement of Investment Policy and Objectives (SIPO) for the Macquarie Investment Funds.

## Top 10 investments

## Further information

You can also obtain this information, the PDS for the Macquarie Investment Funds Goals Based Funds, and some additional information from the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose).

## Notes

1. In March 2022, Macquarie Asset Management Holdings Pty Limited completed the acquisition of AMP Capital's Global Equities and Fixed Income business from AMP Group Holdings Limited. Prior to that acquisition, Macquarie Asset Management Public Investments (NZ) Limited was known as AMP Investment Management (N.Z.) Limited and the Macquarie Global Multi-Asset Fund was known as the AMP Capital Global Multi-Asset Fund then on the 27 September 2022 the Fund became the Macquarie Real Return Opportunities Fund.
2. Real Return is the return before the deduction of tax, expenses and fees and assumes all income is reinvested and adjusted for trimmed mean inflation.
3. The expected volatility of the Macquarie Real Return Opportunities Fund has been calculated by reference to the expected volatility of the underlying funds into which it invests.
4. There is no appropriate market index or suitable peer group index or indices for the fund against which to assess either movements in the market in relation to the returns from the assets in which the fund invests, or the performance of the fund as a whole.
5. These returns are for the periods ending 30 September 2022.
6. The bar graph shows fund returns after the deduction of fees and tax.
7. The returns and tax calculations used in this example are the actual fund returns and tax charges (or rebates) for the year ended 31 March 2022. Net of tax returns can be more than gross of tax returns where, due to the fund's tax position, it receives a tax rebate rather than paying tax.
