

# FUND UPDATE

FOR THE QUARTER ENDED 30 SEPTEMBER 2021

## AMP Capital Investment Funds

### AMP Capital NZ Short Duration Fund

This fund update was first made publicly available on: 29 October 2021

#### What is the purpose of this update?

This document tells you how the AMP Capital NZ Short Duration Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. AMP Investment Management (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The fund is an actively managed portfolio of fixed interest securities, focusing predominantly on corporate securities in the New Zealand and Australian market with a shorter average maturity than a standard fixed interest fund.

The fund specifically targets credit risk and interest rate risk as a source of return. Investment is in a range of fixed interest securities, including corporate, bank, local authority and state owned enterprise bonds, mortgage and asset-backed securities, infrastructure debt, government bonds, credit default swaps, interest rate swaps, cash and cash-like securities. The fund may also contain a modest amount of foreign currency fixed interest securities, 100% hedged back to New Zealand dollars.

Environmental, Social and Governance characteristics are integrated into our investment process.

The performance objective of the fund is to provide a Gross Return (see note 1 below) above the return of the Bloomberg NZBond Swaps 1-3 Year Index on a rolling three year basis.

<b>Total value of the fund</b>	NZ\$428,281,429
<b>The date the fund started</b>	28 September 2007

#### What are the risks of investing?

Risk indicator for the AMP Capital NZ Short Duration Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period to 30 September 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

#### How has the fund performed?

	Average over past 5 years	Past year

#### Annual Return Graph<sup>3</sup>

<sup>3</sup> Average Annual Return for the last 10 years to 30 September 2021

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 September 2021.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

### What fees are investors charged?

Investors in the AMP Capital NZ Short Duration Fund are charged fund charges. In the year to 31 March 2021 these were:

	% of net asset value
<b>Total fund charges</b>	0.58%
Which are made up of:	
<b>Total management and administration charges</b>	0.58%
Including:	
Manager's basic fee (excluding GST)	0.55%
Other management and administration charges (including GST)	0.03%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the AMP Capital Investment Funds Cash and Fixed Interest Funds on the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose) for more information about those fees.

### Example of how this applies to an investor<sup>4</sup>

Small differences in fees and charges can have a big impact on your investment over the long term.

Jeff had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Jeff received a return after fund charges were deducted of \$188 (that is 1.88% of his initial \$10,000). This gives Jeff a total return after tax of \$135 for the year.

## Notes

1. Gross Return is the return before the deduction of tax, expenses and fees and assumes all income is reinvested.
2. These returns are for the periods ending 30 September 2021.
3. The bar chart shows fund returns after the deduction of fees and tax, however, the market index returns are shown before any fees or tax are deducted.
4. The returns and tax calculations used in this example are the actual fund returns and tax charges (or rebates) for the year ended 31 March 2021. Net of tax returns can be more than gross of tax returns where, due to the fund's tax position, it receives a tax rebate rather than paying tax.
5. Cash and Cash Equivalents may include term deposits and promissory notes that are held as a strategic holding and not for liquidity purposes.
